COPYING

The *Journal* is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/86/4686-0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $66 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 162–173, 1986, is £334 (US $760 in the USA and Canada) for institutions; £167 (US $380) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Volume 166 May 1986

CONTENTS

A liquid drop on an air cushion as an analogue of Leidenfrost boiling. M. A. Goldshtik, V. M. Khanin and V. G. Ligai *page* 1

Convection in horizontal cavities. P. G. Simpkins and K. S. Chen 21

Effect of opposing buoyancy on the flow in free and wall jets. Daniel Goldman and Yogesh Jaluria 41

Shock waves and phase changes in a large-heat-capacity fluid emerging from a tube. Philip A. Thompson, Garry C. Carofano and Yoon-Gon Kim 57

Model studies of the aortic pressure rise just after valve closure. A. A. van Steenhoven and M. E. H. van Dongen 93

Thermals in extremely viscous fluids, including the effects of temperature-dependent viscosity. R. W. Griffiths 115

Particle motions induced by spherical convective elements in Stokes flow. R. W. Griffiths 139

An integral equation for the floating-body problem. T. S. Angell, G. C. Hsiao and R. E. Kleinman 161

Convection in a rotating cylindrical annulus: thermal Rossby waves. F. H. Busse and A. C. Or 173

Interactions among multiple three-dimensional bodies in water waves: an exact algebraic method. Hiroshi Kagemoto and Dick K. P. Yue 189

A turbulent spot in a two-dimensional duct. M. Sokolov, R. A. Antonia and A. J. Chambers 211

On mixing across an interface in stably stratified fluid. Xuequan E and E. J. Hopfinger 227

Thermocapillary and centrifugal-buoyancy-driven motion in a rapidly rotating liquid cylinder. Marc K. Smith 245

Deformation and breakup of slender drops in linear flows. D. V. Khakhar and J. M. Ottino 265

The first instability in spherical Taylor–Couette flow. Géza Schrauf 287

Route to chaos in porous-medium thermal convection. S. Kimura, G. Schubert and J. M. Straus 305

An extension to the short-wave asymptotics of the transmission coefficient for a semi-submerged circular cylinder. D. N. Robertson 325

On the interaction of small-scale oceanic internal waves with near-inertial waves. D. Broutman and W. R. Young 341

Magnetostatic equilibria and analogous Euler flows of arbitrarily complex topology. Part 2. Stability considerations. H. K. Moffatt 359

Structure formation in bidisperse sedimentation. G. K. Batchelor and R. W. Janse van Rensburg 379

Transitions to chaos in two-dimensional double-diffusive convection. Edgar Knobloch, Daniel R. Moore, Juri Toomre and Nigel O. Weiss 409

Microscopic flow near the surface of two-dimensional porous media. Part 1. Axial flow. R. E. Larson and J. J. L. Higdon 449

On time-dependent settling of a dilute suspension in a rotating conical channel. Gustav Amberg, Anders A. Dahlkild, Fritz H. Bark and Dan S. Henningson 473

Free convection in an undulating saturated porous layer: resonant wavelength excitation. D. A. S. Rees and D. S. Riley 503

Reviews

Nonlinear Dynamics and Turbulence, edited by G. I. Barenblatt, G. Iooss and D. D. Joseph 531

Large-scale Dynamical Processes in the Atmosphere, edited by B. J. Hoskins and R. P. Pearce 532
